CRI TASMANIA

New High-Tech Device Makes Balloons Flash, Twinkle, Sparkle and More.

A tiny, ultra-bright new LED device that weighs less than a five cent piece can make any latex balloon containing either air or helium light up, flash, twinkle, sparkle, or even change colors. The device is called a Balloominator, and it's taking the balloon industry by storm. Its patent is currently pending.

"They're real attention getters," says Douglas Oxborrow, president of Ballumination Inc., creator of the Balloominator. "A bunch of balloons is intrinsically festive and when those balloons twinkle, flash or sparkle the 'Wow!' factor intensifies a hundredfold."

Available in red, blue, yellow, green or white the Balloominator illuminates balloons. Select the right colour Balloominator and the perfect latex balloon and you can even watch the balloon change colour – right before your eyes. High-Tech Balloon Device Balloominators even allow pool party planners to illuminate a pool with different colour lights.

The 1 1/4 inch re-usable device emits no heat, will shine at maximum intensity for up to four hours and continue to glow and flash for up to sixteen hours on one set of batteries. They are compatible with sealant used by professional balloon decorators.

Two sets of batteries are included with each reusable Balloominator.

Ballumination Inc. has also created a constant light version of the Balloominator to be used in temporary lighting displays or in plant or gift baskets.
